investigative ophthalmology

A Journal of Clinical and Basic Research

EDITOR

Herbert E. Kaufman, M.D.

Professor of Ophthalmology and Pharmacology
College of Medicine
University of Florida
Gainesville, Florida

MANAGING EDITOR

Maija H. Uotila

University of Florida
Gainesville, Florida

EDITORIAL BOARD

DANIEL M. ALBERT
New Haven, Connecticut

J. STEVENS ANDREWS
Nashville, Tennessee

G. WINSTON BARBER
Philadelphia, Pennsylvania

DWIGHT A. BURKHARDT
Minneapolis, Minnesota

CHANDLER R. DAWSON
San Francisco, California

WILLIAM W. DAWSON
Gainesville, Florida

LYNETTE FEENEY
Portland, Oregon

SIDNEY FUTTERMAN
Seattle, Washington

MORTON GOLDBERG
Chicago, Illinois

PETER GOURAS
Bethesda, Maryland

DAN B. JONES
Houston, Texas

CARL KUPFER
Bethesda, Maryland

ALAN M. LATIES
Philadelphia, Pennsylvania

IRVING H. LEOPOLD
New York, New York

A. EDWARD MAUMENEE
Baltimore, Maryland

WILLIAM H. MILLER
New Haven, Connecticut

STEVEN M. PODOS
St. Louis, Missouri

FRANK M. POLACK
Gainesville, Florida

DAVID A. ROBINSON
Baltimore, Maryland

MELVIN L. RUBIN
Gainesville, Florida

ALAN B. SCOTT
San Francisco, California

MARVIN L. SEARS
New Haven, Connecticut

GERALD WESTHEIMER
Berkeley, California

Subject index*

A

Acetazolamide, effects of, and carotid occlusion on ocular blood flow in unanesthetized rabbits, 954

Ach+eserine, arterial pressure dependency of increased aqueous humor formation induced by, 153

Adenine arabinoside effect on experimental idosuridine-resistant herpes simplex infection, 302

Adenosine monophosphate, cyclic, metabolism in lymphocytes from open-angle glaucoma patients, effects of theophylline on, 686

Adenovirus-produced, human, retinoblastoma-like neoplasms in Sprague-Dawley rats, ultrastructural studies of, 593

Adrenal corticosteroids, modification of l-tyrosine-induced keratopathy by, 39

Adrenergic and cholinergic nerve endings in trabecular meshwork, identification of, 525

Aerobic exercise on intraocular pressure effect of, 74

Akinesia and anesthesia, retrobulbar injection of bupivacaine (Marcaine) for, 157

Albino rats, photoreceptor degeneration in, dependency on age, 334

Albinos, human, asymmetric visually evoked potentials in, evidence for visual system anomalies, 430

Alignment and convergence, eye, in cats, consequences of alternating monocular deprivation on, 121

Allografts, corneal, efferent limb protection of, from immune rejection, 395

Alpern, Mathew, introduction of, 644

Alpha-crystallin polypeptide chains, transformation of, with aging, 135

Amblyopia, visual evoked response to stationary checkerboard patterns in children with, 293

AMP, cyclic, in ocular tissues of rabbit, monkey, and human, 475

derivatives, cyclic, effects of isoproterenol and, on cell division in cultured rat lenses, 210

Anemias, megaloblastic, cytological changes in conjunctiva in, 870

Anesthesia and akinesia, retrobulbar injection of bupivacaine (Marcaine) for, 157

Anisotropic factors, model of, contributing to retinal venous nicking, 629

Announcements, 80, 238, 323, 406, 478, 638, 706, 810, 894, 1050

Anomalies, visual system, asymmetric visually evoked potentials in human albinos, evidence for, 430

Anterior chamber, oxygen gradients in, of anesthetized rabbits, 386

temperature profiles in, during phaco-emulsification, 71

Antibiotics or vaccine, trachoma, 85

Antibodies, ultrastructural localization of herpes simplex virus antigens on rabbit corneal cells using sheep antihuman IgG antihorse ferritin hybrid, 819

Antigens (HL-A) of pure cell populations, human corneal cells in vitro, morphology and histocompatibility of, 23

retinal, in patients with pigmentary retinal degenerations, cell-mediated, 198

soluble, of bovine cornea, 304

virus, herpes simplex, ultrastructural localization of, on rabbit corneal cells using sheep antihuman IgG antihorse ferritin hybrid antibodies, 819

Antinuclear antibodies in open-angle glaucoma, 693

Aqueous humor and tears, quantitative determination of complement components and immunoglobulins in, 151

composition, effects of experimental uveitis on anterior uveal prostaglandin transport and, 959

dual nature of pilocarpine to stimulate or inhibit formation of, 617

formation in enucleated, arterially perfused cat eye, pharmacodynamic study of inhibitory effects of l-norepinephrine, l-epinephrine, and d,l-isoproterenol on, 392

inhibitory effect of pentobarbital Na on, 384

growth factors in, of normal and inflamed eyes of rabbits, 868

HCO_3 formation in, mechanism and relation to treatment of glaucoma, 479

proteins, effects of near UV light photoproducts of epinephrine on, 127

tumor formation, increased, arterial pressure dependency of, induced by Ach+eserine, 153

Arachidonic acid-induced ocular effects by 1-tetrahydrocannabinol, antagonism of, 422

Argon laser and xenon arc photocoagulation in blood vessel closure, effectiveness of, studies on intravitreal blood vessels, 441

*January, pp. 1-80; February, pp. 81-158; March, pp. 159-238; April, pp. 239-324; May, pp. 325-408; June, pp. 409-478; July, pp. 479-554; August, pp. 555-638; September, pp. 639-708; October, pp. 709-810; November, pp. 811-906; December, pp. 907-1070.

Argon laser—Cont'd
photocoagulation of human retina, histopathologic correlation of chorioretinal lesions in region of maculopapillar bundle, 1024
studies on intravitreal blood vessels, effectiveness of intraocular diathermy on blood vessel closure, comparison with, 369
Arterial pressure dependency of increased aqueous humor formation induced by Ach+eserine, 153
Arteries, ciliary, pharmacological reactivity of isolated, 389
ARVO financial statement, 407
General Business Meeting, 636
Aspartate, sodium, lenticular and fundus changes induced by intraocular infusion of, 459
Asteroid bodies, composition of, 699
Avian glaucoma, genesis of light-induced, 872
Axonal protein flow, effects of elevated intraocular pressure on slow, 689
Axoplasmic transport, 81
functional implications of, 639
rapid, in monkey optic nerve, effect of intraocular pressure on, 771

B

Biologic response to pilocarpine, role of cornea in, 377
Blind, prostheses for the, 641
Blood-aqueous barrier, effects of paracentesis on, an electron microscopic study on *Macaca mulatta* using horseradish peroxidase as tracer, 828
vessels, intravitreal, new experimental model, 362
studies on, effectiveness of xenon arc and argon laser photocoagulation in blood vessel closure, 441
on intraocular diathermy on blood vessel closure, comparison with argon laser, 369
Bodies, asteroid, composition of, 699
Bovine cornea, soluble antigens of, 304
Bundle, maculopapillar, argon laser photocoagulation of human retina, histopathologic correlation of chorioretinal lesions of in region of, 1024
Bupivacaine (Marcaine), retrobulbar injection of, for anesthesia and akinesia, 157

C

Calcium and high molecular weight protein aggregates in bovine and human lens, 982
content, light-dependent, of rod outer segment disc membranes, 698
oxalate retinopathy associated with generalized oxalosis, x-ray diffraction and electron microscopic studies of crystal deposits, 256
Cannabinol, l-tetrahydro, antagonism of arachidonic acid-induced ocular effects by, 422
Carotid occlusion, effects of acetazolamide and, on ocular blood flow in unanesthetized rabbits, 954
Cat, consequences of alternating monocular deprivation on eye alignment and convergence in, 121
eye muscle nerves, activation of slow motor units by threshold stimulation of, 879
pharmacodynamic study of inhibitory effects of l-norepinephrine, l-epinephrine, and d,l-isoproterenol on aqueous humor formation in enucleated, arterially perfused, 392
Cataract formation, mechanisms initiating, 713
workshop, report on National Eye Institute, 325
Cautery, intraocular pressure following long posterior ciliary canal, in primates, 468
Cells, corneal epithelial and endothelial, cell-surface receptors of normal, regenerating, and cultured, 935
Cells—Cont'd
junctions in embryonic and fetal human corneal endothelium, electron microscopy of development of, 923
mediated immunity to retinal antigens in patients with pigmentary retinal degenerations, 198
proliferation, induction of endothelial, in rat retinal venules by chemical and indirect physical trauma, 580
surfaces, corneal epithelial, utilizing scanning electron microscope, comparative study of, 906
receptors of normal, regenerating, and cultured corneal epithelial and endothelial cells, 935
Cellular communication, sites of permeability barriers and, intercellular junctions, 811
Center and surround, 242
Chains, transformation of alpha-crystallin polypeptide, with aging, 135
Checkerboard patterns, stationary, in children with strabismic amblyopia, visual evoked response to, 293
Chemotaxis of polymorphonuclear leukocytes in corneal inflammation, tissue injury in herpes simplex virus infection, 187
Chickens and pigeons, isolated retina, autoradiographic study of cells accumulating ^{3}Hγ-aminobutyric acid in, 602
Chloroquine, in vitro inhibition of protein synthesis in retinal pigment epithelium by, 107
Cholinergic and adrenergic nerve endings in trabecular meshwork, identification of, 525
Choriomeningitis virus, lymphocytic, immunopathologic uveitis in mouse due to, 33
Chorioretinal lesions in region of maculopapillar bundle, argon laser photocoagulation of human retina, histopathologic correlation of, 1024

Chorioretinal lesions—Cont'd
nature of, produced by gallium arsenide laser, 471
Choroidal malignant melanoma by hematoporphyrin derivative fluorescence in rabbits, diagnosis of model, 244
Ciliary arteries, pharmacological reactivity of isolated, 389
canal cautery, long posterior, in primates, intraocular pressure following, 468
process, localization of ^{35}-sulfated macromolecules at site of active transport in, 882
Cogan, David, 710
Collagenase, conjunctival, partial purification, 546
Color fundus photographs, viewer for correlation of fluorescein and, 398
what is it that confines in a world without, 647
Complement components and immunoglobulins in tears and aqueous humor, quantitative determination of, 151
Cone and rod densities in Rhesus, 885
estimation of ratio of, to neurons in fovea of human retina, 1045
mechanisms in the electroretinogram of cynomolgus monkey, 266
Conjunctiva, cytological changes in, in megaloblastic anemias, 970
epithelial cell phagocytosis of *Listeria mpnocytogenes* in, 623
Connections, vestibulo-ocular, 409
Contact lenses, intraocular pressure measurement with instrumented, 299
Convergence and alignment, eye, in cats, consequences of alternating monocular deprivation on, 121
Cornea, anti-inflammatory effectiveness on, of topically administered prednisolone, 737
destroying enzyme of *Pseudomonas aeruginosa*, 174
living, endothelial permeability of, to fluorescein, 945
Cornea—Cont'd
prednisolone phosphate penetration into and through, 316
rabbit, isolated, permeability of, to corticosteroids, 457
transport of pilocarpine by, 312
role of, in biologic response to pilocarpine, 377
soluble antigens of bovine, 304
Corneal allografts, efferent limb protection of, from immune rejection, 395
cells in vitro, human, morphology and histocompatibility (HL-A) antigens of pure cell populations, 23
rabbit, ultrastructural localization of herpes simplex virus antigens on, using sheep antihuman IgG antihorse ferritin hybrid antibodies, 819
endothelium, effect of topical steroids on healing of, 17
embryonic and fetal human, electron microscopy of development of cell junctions in, 923
epithelial and endothelial cells, cell-surface receptors of normal, regenerating, and cultured, 935
cell surfaces utilizing scanning electron microscope, comparative study of, 906
regeneration and epidermal growth factor, kinetics of, 804
inflammation, tissue injury in herpes simplex virus infection, chemotaxis of polymorphonuclear leukocytes in, 187
storage, improved, 165
intermediate-term, 219
surfaces, posterior, in Fuch's dystrophy, scanning electron microscope study, 913
wound healing, in vitro studies of, epithelial-endothelial interactions, 575
Corneas, human, a scanning electron microscopic study, endothelial survival in cryopreserved, 7
ultrastructure of M-K and refrigerated moist chamber-stored, 859
Corticosteroids, adrenal, modification of 1-tyrosine-induced keratopathy by, 39
permeability of isolated rabbit cornea to, 457
Counseling, genetic, use of tears for heterozygote detection and, 159
Cryopreserved human corneas, a scanning electron microscopic study, endothelial survival in, 7
Cryptococcal meningitis, possible cause of decreased vision in, 801
Crystal deposits, calcium oxalate retinopathy associated with generalized oxalosis, x-ray diffraction and electron microscopic studies of, 256
Crystalline lens, movement of procion dye in, 147
studies on, bidirectional carrier-mediated transport of lithium, 784
Cyanide optic neuropathy, fine structure of experimental, 748
Cyclic nucleotide metabolism in human photoreceptors, 535
phosphodiesterase, histochemical evidence of, in photoreceptor outer segments, 740
Cyclitis produced in rats by cyclophosphamide, 695
Cyclophosphamide, cyclitis produced in rats by, 695
Cynomolgus monkey, cone mechanisms in electroretinogram of, 266
functional and electron microscopic changes in trabecular meshwork remaining after trabeculectomy in, 511

D

Degeneration, retinal, central, feline, 608
retinal, pigmentary, cell-mediated immunity to retinal antigens in patients with, 198
Densities, rod and cone, in Rhesus, 885
Detergent, regeneration of rhodopsin following removal of, 155

Diathermy, intraocular, effectiveness of, on blood vessel closure, comparison with argon laser, studies on intravitreal blood vessels, 369
Digital photogrammetry of optic-nerve head, 116
DNA-repair in retina, qualitative investigations of neuroepithelium, inner nuclear layer, and ganglion cell layer in rabbit retinae, autoradiographic studies of, 290
Dog, Alaskan malamute, pathology of hemeralopia in, 231
Dystrophy, Fuch's, posterior corneal surfaces in, scanning electron microscope study, 913
retinal, in pigmented rat, 87
vitamin A transporting protein complex in human hereditary pigmentous, 288

E

Editor, letter to the, 634, 704, 889
Efferent limb protection of corneal allografts from immune rejection, 395
Electron microscope, scanning, comparative study of corneal epithelial cell surfaces utilizing, 906
study, posterior corneal surfaces in Fuchs' dystrophy, scanning, 913
microscopic studies of crystal deposits, calcium oxalate retinopathy associated with generalized oxalosis, x-ray diffraction and, 256
study of *Macaca mulatta* using horseradish peroxidase as tracer, effects of paracentesis on blood-aqueous barrier, 828
scanning, endothelial survival in cryopreserved human corneas, 7
microscopy of development of cell junctions in embryonic and fetal human corneal endothelium, 923
Electroretinogram of children deprived of pattern vision, 538
cynomolgus monkey, cone mechanisms in, 266
Endothelial cell proliferation, induction of, in rat retinal venules by chemical and indirect physical trauma, 580
permeability of living cornea to fluorescein, 945
survival in cryopreserved human corneas, a scanning electron microscopic study, 7
Endothelium, corneal, effect of topical steroids on healing of, 17
embryonic and fetal human, electron microscopy of development of cell junctions in, 923
Enzyme, cornea-destroying, of *Pseudomonas aeruginosa*, 174
Epidermal growth factor, kinetics of, corneal epithelial regeneration and, 804
Epinephrine, effects of near UV light photoproducts of, on aqueous humor proteins, 127
l-Epinephrine, l-norepinephrine, and d,l-isoproterenol on aqueous humor formation in the enucleated, arterially perfused cat eye, pharmacodynamic study of inhibitory effects of, 392
Epithelial and endothelial cells, corneal, cell-surface receptors of normal, regenerating, and cultured, 935
cell phagocytosis of *Listeria monocytogenes* in the conjunctiva, 623
Epithelium, retinal pigment, chemical composition and structure, 673
in vitro inhibition of protein synthesis in, by chloroquine, 107
Esterase I, some enzymic properties of human lens, 466
Eye alignment and convergence in cats, consequences of alternating monocular deprivation of, 121
muscle nerves, cat, activation of slow motor units by threshold stimulation of, 879
rabbit, microangiography of, radiographic study, 543

F

Feline central retinal degeneration, 608
Fenoprofen and ocular prostaglandin production, 235
Fibers, lens, ultrastructure of rat eye, 274
Fibrinolytic activity of vitreous body, 875
Fluorescein and color fundus photographs, viewer for correlation of, 398
endothelial permeability of living cornea to, 945
Fluorescence, hematoporphyrin derivative, in rabbits, diagnosis of model choroidal malignant melanoma by, 244
Fovea of human retina, estimation of ratio of cones to neurons in, 1045
Friedenwald lecture, 1973, 560
Friedenwald lecture, 1974, 647
Fuchs' dystrophy, posterior corneal surfaces in, scanning electron microscope study, 913
Fundus and lenticular changes induced by intraocular infusion of sodium aspartate, 459
photographs, color, viewer for correlation of fluorescein and, 398
rabbit, measured and predicted laser-induced temperature rises in, 60

G

Gallium arsenide laser, nature of chorioretinal lesions produced by, 471
Ganglion cell layer, inner nuclear layer, and neuroepithelium, in rabbit retinae, autoradiographic studies of DNA-repair in retina, qualitative investigations of, 290
Gas, sulfur hexafluoride, dynamics of intravitreal, 863
Genetic counseling, use of tears for heterozygote detection and, 159
inflammatory disease, 555
Glaucoma, avian, genesis of light-induced, 872
experimental, in rhesus monkey, 455
HCO_3^- formation in aqueuos humor, mechanism and relation to treatment of, 479

Glaucoma—Cont'd
laser treatment for, 3
open-angle, antinuclear antibodies in, 693
patients, open-angle, effects of theophylline on cyclic adenosine monophosphate metabolism in lymphocytes from, 686
Glycoprotein, insoluble structural, major constituent of zonula Zinni, 991
Granule, pigment, movement in *Limulus* photoreceptors, 401
Growth factor, epidermal, kinetics of, corneal epithelial regeneration of, and, 804

H

^{3}H-γ-aminobutyric acid in isolated retinas of pigeons and chickens, an autoradiographic study of cells accumulating, 602
HCO_3^- formation in aqueous humor, mechanism and relation to treatment of glaucoma, 479
Hematoporphyrin derivative fluorescence in rabbits, diagnosis of model choroidal malignant melanoma by, 244
Hemeralopia in Alaskan malamute dog, pathology of, 231
Hemodynamic studies, ocular, in man, injection method for, 77
Herpes simplex infection, adenine arabinoside effect on experimental idosuridine-resistant, 302
ultrastructural localization of, 1
virus antigens, ultrastructural localization of, on rabbit corneal cells using sheep antihuman IgG antihorse ferritin hybrid antibodies, 819
infection, chemotaxis of polymorphonuclear leukocytes in corneal inflammation, tissue injury in, 187
Heterozygote detection and genetic counseling, use of tears for, 159
Histopathology of keratopathy in tyrosine-fed rat, 1037
Horseradish peroxidase as tracer, effects of paracentesis on blood-aqueous barrier, electron microscopic study on *Macaca mulatta* using, 828
Hydrophilic lenses, therapeutic uses of, 484

I

Idosuridine-resistant herpes simplex infection, adenine arabinoside effect on experimental, 302
Immune rejection, efferent limb protection of corneal allografts from, 395
Immunity, cell-mediated, to retinal antigens in patients with pigmentary retinal degenerations, 198
Immunoglobulins and complement components, in tears and aqueous humor, quantitative determination of, 151
Infection, herpes simplex virus, chemotaxis of polymorphonuclear leukocytes in corneal inflammation, tissue injury in, 187
Infectious disease pathogenesis, immunologic modulation of, 560
Inflammation, corneal, tissue injury in herpes simplex virus infection, chemotaxis of polymorphonuclear leukocytes in, 187
Inflammatory disease, genetic, 555
Infusion, intraocular, of sodium aspartate, lenticular and fundus changes induced by, 459
Inner nuclear layer, and ganglion cell layer in rabbit retinae, autoradiographic studies of DNA-repair in retina, qualitative investigations of neuroepithelium, 290
Intercelllular junctions, site of permeability barriers and cellular communication, 811
Interreceptoral junctions in teleost retina, 996
Intraocular diathermy, effectiveness of, on blood vessels closure, comparison with argon laser, studies on intravitreal blood vessels, 369
Intraocular—Cont'd
infusion of sodium aspartate, lenticular and fundus changes induced by, 459
pressure, effect of aerobic exercise on, 74
on rapid axoplasmic transport in monkey optic nerve, 771
elevated, on slow axonal protein flow, effects of, 689
following long posterior ciliary canal cautery in primates, 468
measurement with instrumented contact lenses, 299
model in unanesthetized rabbits, characteristics and pharmacologic utility of, 319
Intravitreal blood vessels, new experimental model, 362
studies on, effectiveness of xenon arc and argon laser photocoagulation in blood vessel closure, 441
on intraocular diathermy on blood vessel closure, comparison with argon laser, 369
Irradiation, ocular, with accelerated protons, experimental, 280
Isoproterenol and cyclic AMP derivatives on cell division in cultured rat lenses, effects of, 210
d,l-Isoproterenol, l-epinephrine, and l-norepinephrine on aqueous humor formation in the enucleated, arterially perfused cat eye, pharmacodynamic study of inhibitory effects of, 392

J

Junctions, intercellular, sites of permeability barriers and cellular communications, 811

K

Keratitis, varicella dendritic, 764
Keratopathy, histopathology of, in tyrosine-fed rat, 1037
modification of l-tyrosine-induced, by adrenal corticosteroids, 39

L

Lactoferrin, tear, bacteriostatic and complexing protein, 550
Laser, gallium arsenide, nature of chorioretinal lesions produced by, 471
induced temperature rises in rabbit fundus, measured and predicted, 60
photocoagulation, argon, of human retina, histopathologic correlation of chorioretinal lesions in region of maculopapillar bundle, 1024
treatment for glaucoma, 3
LCM virus-induced uveitis, role of T-lymphocytes, immunopathogenesis of, 229
Lens, bovine and human, calcium and high molecular weight protein aggregates in, 982
crystalline, movement of procion dye in, 147
denucleation process of, 973
esterase I, human, some enzymic properties of, 466
fibers, ultrastructure of rat eye, 274
isolated, effects of xylose on, 204
porcine, effects of fasting and refeeding on morphological and biochemical properties of, 308
proteins, human, age-dependent changes in molecular size of, relationship to light scatter, 795
valinomycin-stimulated ^{86}-rubidium transport and efflux from, 310
Lenses and retinas of mice, effects of near-ultraviolet light on, 462
hydrophilic, therapeutic uses of, 484
rat, cultured, effects of isoproterenol and cyclic AMP derivatives on cell division in, 210
Lenticular and fundus changes induced by intraocular infusion of sodium aspartate, 459
Lesions, chorioretinal, in region of maculopapillar bundle, argon laser photocoagulation of human retina, histopathologic correlation of, 1024
Lesions—Cont'd
nature of, produced by gallium arsenide laser, 471
Leukocytes, polymorphonuclear, in corneal inflammation, tissue injury in herpes simplex virus infection, chemotaxis of, 187
Light scatter, age-dependent changes in molecular size of human lens proteins and relationship to, 795
Limb protection, efferent, of corneal allografts from immune rejection, 395
Limulus photoreceptors, pigment granule movement in, 401
Lithium, bidirectional carrier-mediated transport of, studies on the crystalline lens, 784
Listeria monocytogenes in the conjunctiva, epithelial cell phagocytosis of, 623
Lymphocytes from open-angle glaucoma patients, effects of theophylline on cyclic adenosine monophosphate metabolism in, 686
T, immunopathogenesis of LCM virus-induced uveitis, role of, 229
Lysosomes and ingested polystyrene spheres, interactions between, phagocytic activity of pigmented retinal epithelium, 1016

M

Macaca mulatta, an electron microscopic study on, using peroxidase horseradish as tracer, effects of paracentesis on blood-aqueous barrier, 828
Macromolecules, ^{35}-sulfated, localization of, at site of active transport in ciliary process, 882
Maculopapillar bundle, argon laser photocoagulation of human retina, histopathologic correlation of chorioretinal lesions of in region of, 1024
Malamute dog, pathology of hemeralopia in Alaskan, 231
Marek's disease, ocular manifestations of, 586
Measure it, if I can't, what do I do with it? 412
Melanoma, diagnosis of model choroidal malignant, by hematoporphyrin derivative of fluorescence in rabbits, 244
Membranes, rod outer segment disc, light-dependent Ca^{++} content of, 698
Meningitis, cryptococcal, possible cause of decreased vision in, 801
Meshwork, trabecular, identification of adrenergic and cholinergic nerve endings in, 525
remaining after trabeculectomy in cynomolgus monkeys, functional and electron microscopic changes in, 511
Metabolism, cyclic nucleotide, in human photoreceptors, 535
Mice, near-ultraviolet light effects on lenses and retinas of, 462
Microangiography of rabbit eye, radiographic study, 543
Microscope, scanning slit optical, 1033
M-K, ultrastructure of, and refrigerated moist chamber-stored corneas, 859
Monkey, cone mechanisms in electroretinogram of cynomolgus, 266
cynomolgus, functional and electron microscopic changes in trabecular meshwork remaining after trabeculectomy in, 511
optic nerve, effect of intraocular pressure on rapid axoplasmic transport in, 771
rabbit, and human, cyclic-AMP in ocular tissues of, 475
retinal degeneration in, induced by deficiencies of vitamin E or A, 499
rhesus, experimental glaucoma in, 455
unit activity in accessory optic system in, 533
Monocular deprivation of eye alignment and convergence in cats, consequences of alternating, 121

Motor units, slow, activation of, by threshold stimulation of cat eye muscle nerves, 879
Mouse, immunopathologic uveitis in, due to lymphocytic choriomeningitis virus, 33
Müller cells in human retina as revealed by ruthenium red treatment, fine structure of, 1041

N

National Eye Institute cataract workshop, report on, 325
Neoplasms, human adenovirus-produced retinoblastoma-like, in Sprague-Dawley rats, ultrastructural studies of, 593
Nerves, cat eye muscle, activation of slow motor units by threshold stimulation of, 879
endings, adrenergic and cholinergic, in trabecular meshwork, identification of, 525
fiber of primate retina, autoradiographic study, 95
Nervehead, optic, digital photogrammetry of, 116
Neuroepithelium, inner nuclear layer, and ganglion cell layer in rabbit retinae, autoradiographic studies of DNA-repair in retina, qualitative investigations of, 290
Neurons in fovea of human retina, estimation of ratio of cones to, 1045
Neuropathy, cyanide optic, fine structure of experimental, 748
l-Norepinephrine, l-epinephrine, and d,l-isoproterenol on aqueous humor formation in the enucleated, arterially perfused cat eye, pharmacodynamic study of inhibitory effects of, 392
Notice, special, 333

O

Ocular blood flow in unanesthetized rabbits, effects of acetazolamide and carotid occlusion on, 954
Ocular—Cont'd
effects, antagonism of arachidonic acid-induced, by l-tetrahydrocannabinol, 422
hemodynamic studies in man, injection method for, 77
irradiation with accelerated protons, experimental, 280
manifestations of Marek's disease, 586
prostaglandin production, fenoprofen and, 235
surgery, perfluoropentane in experimental, 627
tissues of rabbit, monkey, and human, cyclic-AMP in, 475
Ocusert, evaluation of pilocarpine, 296
Optic-disk oxygen tension, autoregulation of, 101
nerve, monkey, effect of intraocular pressure on rapid axoplasmic transport in, 771
nervehead, digital photogrammetry of, 116
neuropathy, cyanide, fine structure of experimental, 748
system, accessory, in alert monkeys, unit activity in, 533
Optical microscope, scanning slit, 1033
Oxalosis, x-ray diffraction and electron microscopic studies of crystal deposits, calcium oxalate retinopathy associated with generalized, 256
Oxygen gradients in anterior chamber of anesthetized rabbits, 386
tension, optic-disk, autoregulation of, 101

P

Paracentesis, effects of, on blood-aqueous barrier, an electron microscopic study on *Macaca mulatta* using horseradish peroxidase as a tracer, 828
Pathogenesis, immunologic modulation of infectious disease, 560
Pattern vision, electroretinogram of children deprived of, 538
Pentobarbital Na, inhibitory effect of, on aqueous humor formation, 384
Perfluoropentane in experimental ocular surgery, 627
Permeability barriers and cellular communication, intercellular junctions, sites of, 811
Phaco-emulsification, temperature profiles in anterior chamber during, 71
Phagocytic activity of pigmented retinal epithelium, interactions between lysosomes and ingested polystyrene spheres, 1016
Phagocytosis, epithelial cell, of *Listeria monocytogenes* in the conjunctiva, 623
Pharmacodynamic study of inhibitory effects of l-norepinephrine, l-epinephrine, and d,l-isoproterenol on aqueous humor formation in enucleated, arterially perfused cat eye, 392
Phosphodiesterase, cyclic nucleotide, histochemical evidence of, in photoreceptor outer segments, 740
Photocoagulation, argon laser, of human retina, histopathologic correlation of chorioretinal lesions in region of maculopapillar bundle, 1024
xenon arc and argon laser, in blood vessel closure, effectiveness of, studies on intravitreal blood vessels, 441
Photogrammetry, digital, of optic-nerve head, 116
Photoreceptor degeneration in albino rats, dependency on age, 334
human, cyclic nucleotide metabolism in, 535
pigment granule movement in *Limulus*, 401
Pigeons and chickens, isolated retina, autoradiographic study of cells accumulating ^{3}H-γ-aminobutyric acid in, 602

Pigment epithelium, retinal, chemical composition and structure, 673
granule movement in *Limulus* photoreceptors, 401
Pilocarpine, dual nature of, to stimulate or inhibit the formation of aqueous humor, 617
Ocusert, evaluation of, 296
role of cornea in biologic response to, 377
transport of, by isolated rabbit cornea, 312
Polystyrene spheres, phagocytic activity of pigmented retinal epithelium, interactions between lysosomes and ingested, 1016
Porcine lens, effects of fasting and refeeding on morphological and biochemical properties of, 308
Potentials, visually evoked, asymmetric, in human albinos, evidence for visual system anomalies, 430
Prednisolone, anti-inflammatory effectiveness on cornea of topically administered, 757
phosphate penetration into and through the cornea, 316
Prenatal rat retina, development of, 725
Pressure, intraocular, model in unanesthetized rabbits, characteristics and pharmacologic utility of, 319
Primates, intraocular pressure following long posterior ciliary canal cautery in, 468
retina, autoradiographic study, nerve-fiber of, 95
retinal synaptogenesis in, 340
Procion dye, movement of, in crystalline lens, 147
Proctor medal award, 711
Prostaglandin biosynthesis, ocular, comparison of inhibitory activity of compounds on, 967
ocular, production, fenoprofen and, 235
transport and aqueous humor composition, effects of experimental uveitis on anterior uveal, 959
Prostheses for the blind, 641
Protein aggregates, high molecular weight, in bovine and human lens, calcium and, 982
aqueous humor, effects of near UV light photoproducts of epinephrine on, 127
complex, vitamin A transporting, in human hereditary pigmentous retinal dystrophy, 288
flow, axonal, effects of elevated intraocular pressure on slow, 689
retinol-binding, retinitis pigmentosa and, 239
synthesis in retinal pigment epithelium by chloroquine, in vitro inhibition of, 107
tear lactoferrin, bacteriostatic and complexing, 550
Protons, accelerated, experimental ocular irradiation with, 280
Pseudomonas aeruginosa, cornea-destroying enzyme of, 174

R

Rabbits, anesthetized, oxygen gradients in anterior chamber of, 386
characteristics and pharmacologic activity of an intraocular pressure model in unanesthetized, 319
cornea, isolated, transport of pilocarpine by, 312
cells, ultrastructural localization of herpes simplex virus antigens on, using sheep antihuman IgG antihorse ferritin hybrid antibodies, 819
isolated, permeability of, to corticosteroids, 457
detailed assessment procedure of anti-inflammatory effects of drugs on experimental immunogenic uveitis in, 414
diagnosis of model choroidal malignant melanoma by hematoporphyrin derivative fluorescence in, 244
eye, microangiography of, radiographic study, 543
fundus, measured and predicted laser-induced temperature rises in, 60
growth factors in aqueous humor of normal and inflamed eyes of, 868
Rabbit—Cont'd
monkey, and human, cyclic-AMP in ocular tissues of, 475
retinae, autoradiographic studies of CNA-repair in retina, qualitative investigations of neuroepithelium, inner nuclear layer, and ganglion cell layer in, 290
unanesthetized, effects of acetazolamide and carotid occlusion on ocular blood flow in, 954
Rats, albino, photoreceptor degeneration in, dependency on age, 334
cyclitis produced in, by cyclophosphamide, 695
eye lens fibers, ultrastructure of, 274
histopathology of keratopathy in tyrosine-fed, 1037
lenses, cultured, effects of isoproterenol and cyclic AMP derivatives on cell division in, 210
mature, retinal degeneration in, comparison of disease in Osborne-Mendel and spontaneously hypertensive Wistar strain, 1010
pigmented, retinal dystrophy in, 87
retina, development of prenatal, 725
retinal venucles, induction of endothelial cell proliferation in, by chemical and indirect physical trauma, 580
Sprague-Dawley, ultrastructural studies of human adenovirus-produced retinoblastoma-like neoplasms in, 593
Reading disorders and their remedy, research in, 160
Receptors, cell-surface, of normal, regenerating, and cultured corneal epithelial and endothelial cells, 935
optic wave-guide effects, 556
Refraction, automated, 814
Regeneration, corneal epithelial, and epidermal growth factor, kinetics of, 804
Replica technique, age changes of inner surface of trabecular meshwork shown by, 950

Retinal antigens in, patients with pigmentary retinal degenerations, cell-mediated immunity to, 198
degeneration, central, feline, 608
in mature rats, comparison of disease in Osborne-Mendel and spontaneously hypertensive Wistar strain, 1010
in monkeys induced by deficiencies of vitamin E or A, 499
pigmentary, cell-mediated immunity to retinal antigens in patients with, 198
dystrophy in pigmented rat, 87
vitamin A transporting protein complex in human hereditary pigmentous, 288
epithelium, pigmented, phagocytic activity of, interactions between lysosomes and ingested polystyrene spheres, 1016
pigment epithelium, in vitro inhibition of protein synthesis in, by chloroquine, 107
epithelium, chemical composition and structure, 673
synaptogenesis in primate, 340
venous nicking, model of anisotropic factors contributing to, 629
venules, rat, induction of endothelial cell proliferation in, by chemical and indirect physical trauma, 580
Retinas and lenses of mice, effects of near-ultraviolet light on, 462
human, argon laser photocoagulation of, histopathologic correlation of chorioretinal lesions in region of maculopapillar bundle, 1024
as revealed by ruthenium red treatment, fine structure of Müller cells in, 1041
estimation of ratio of cones to neurons in fovea of, 1045
pigeons and chickens, isolated, autoradiographic study of cells accumulating ^{3}Hγ-aminobutyric acid in, 602
Retinas—Cont'd
primate, autoradiographic study, nerve-fiber of, 95
qualitative investigations of neuroepithelium, inner nuclear layer, and ganglion cell layer in rabbit retinae, autoradiographic studies of DNA-repair in, 290
rat, development of prenatal, 725
teleost, interreceptoral junctions in, 996
vertebrate, vision and graded potentials in, 1
Retinitis pigmentosa and retinol-binding protein, 239
human, electron microscopic observations of, dominantly inherited, 487
retinol in, evidence that retinol is in normal concentration in serum and retinol-binding protein complex displays unaltered fluorescence properties, 798
Retinol-binding protein, retinitis pigmentosa and, 239
in retinitis pigmentosa, evidence that retinol is in normal concentration in serum and retinol-binding protein complex displays unaltered fluorescence properties, 798
Retinopathy, calcium oxalate, associated with generalized oxalosis, x-ray diffraction and electron microscopic studies of crystal deposits, 256
Retrobulbar injection of bupivacaine (Marcaine) for anesthesia and akinesia, 157
Rhesus, rod and cone densities in, 885
Rhodopsin, regeneration of, following removal of detergent, 155
Rod and cone densities in Rhesus, 885
outer segment disc membranes, light-dependent Ca^{++} content of, 698
material, production rate and removal of, in vitamin A deficiency, 46
vitamin A deficiency-induced rod thinning to permanently decrease production of, 54
^{86}Rubidium transport and efflux from lens, valinomycin-stimulated, 310
Ruthenium red treatment, fine structure of Müller cells in human retina as revealed by, 1041

S

Saccades, velocity characteristics of normal human, 619
Segments, photoreceptor outer, histochemical evidence of cyclic nucleotide phosphodiesterase in, 740
Sheep antihuman IgG antihorse ferritin hybrid antibodies, ultrastructural localization of herpes simplex virus antigens on rabbit corneal cells using, 819
Smelser, George K., in memoriam, 896
Smelser, George K., 1908-1973, 897, 904
Sodium aspartate, lenticular and fundus changes induced by intraocular infusion of, 459
Steroids, topical, on healing of corneal endothelium, effect of, 17
^{35}-Sulfated macromolecules, localization of, at site of active transport in ciliary process, 882
Sulfur hexafluoride gas, dynamics of intravitreal, 863
Surgery, ocular, perfluoropentane in experimental, 627
Synaptogenesis, retinal, in primate, 340

T

Tear lactoferrin, bacteriostatic and complexing protein, 550
and aqueous humor, quantitative determinations of complement components and immunoglobulins in, 151
use of, for heterozygote detection and genetic counseling, 159
Teleost retina, interreceptoral junctions in, 996
Temperature profiles in anterior chamber during phacoemulsification, 71
thermokeratoplasty (TKP), 181

Temperature—Cont'd
rises in rabbit fundus, measured and predicted laser-induced, 60
Tension, oxygen, optic-disk, autoregulation of, 101
1-Tetrahydrocannabinol, antagonism of arachidonic acid-induced ocular effects by, 422
Theophylline, effects of, on cyclic adenosine monophosphate metabolism in lymphocytes in open-angle glaucoma patients, 686
Thermokeratoplasty (TKP) temperature profile, 181
Threshold stimulation of cat eye muscle nerves, activation of slow motor units by, 879
T-lymphocytes, immunopathogenesis of LCM virus-induced uveitis, role of, 229
Trabecular meshwork, age changes of inner surface to, shown by replica technique, 950
identification of adrenergic and cholinergic nerve endings in, 525
remaining after trabeculectomy in cynomolgus monkeys, functional and electron microscopic changes in, 511
Trabeculectomy in cynomolgus monkeys, functional and electron microscopic changes in trabecular meshwork remaining after, 511
Tracer, horseradish peroxidase as, effects of paracentesis on blood-aqueous barrier, electron microscopic study on *Macaca mulatta* using, 828
Trachoma-antibiotics or vaccine, 85
Transport, axoplasmic, 81
functional implications of, 639
Trauma, induction of endothelial cell proliferation in rat retinal venules by chemical and indirect physical, 580
Tyrosine-fed rat, histopathology of keratopathy of, in, 1037
induced keratopathy by adrenal corticosteroids, modification of, 39

U

Ultrastructural studies of human adenovirus-produced retinoblastoma-like neoplasms in Sprague-Dawley rats, 593
Ultrastructure of M-K and refrigerated moist chamber-stored corneas, 859
Ultraviolet light, near, effects on lenses and retinas of mice, 462
photoproducts, effects of near, of epinephrine on aqueous humor proteins, 127
Uveitis, experimental, effects of, on anterior uveal prostaglandin transport and aqueous humor composition, 959
immunogenic, experimental, detailed assessment procedure of anti-inflammatory effects of drugs on, in rabbits, 414
immunopathologic, in mouse due to lymphocytic chorio-meningitis virus, 33
role of T lymphocytes, immunopathogenesis of LCM virus-induced, 229

V

Vaccine or antibiotics, trachoma, 85
Valinomycin-stimulated ^{86}rubidium transport and efflux from lens, 310
Varicella dendritic keratitis, 764
Velocity characteristics of normal human saccades, 619
Venous nicking, retinal, model of anisotropic factors contributing to, 629
Venules, retinal, rat, induction of endothelial cell proliferation in, by chemical and indirect physical trauma, 580
Vertebrate retinas, vision and graded potentials in, 1
Vestibulo-ocular connections, 409
Virus antigens, herpes simplex, ultrastructural localization of, on rabbit corneal cells using sheep antihuman IgG anti-horse ferritin hybrid antibodies, 819
herpes simplex, infection, chemotaxis of polymorphonuclear leukocytes in corneal inflammation, tissue injury in, 187
lymphocytic choriomeningitis, immunopathologic uveitis in mouse due to, 33
Vision and graded potentials in vertebrate retinas, 1
Visual evoked response to stationary checkerboard patterns in children with strabismic amblyopia, 293
system anomalies, asymmetric visually evoked potentials in human albinos, evidence for, 430
Visually evoked potentials, asymmetric, in human albinos, evidence for visual system anomalies, 430
Vitamin A deficiency-induced rod thinning to permanently decrease the production of rod outer segment material, 54
production and removal of rod outer segment material in, 46
transporting protein complex in human hereditary pigmentous retinal dystrophy, 288
E or A, retinal degeneration in monkeys induced by deficiencies of, 499
Vitreous body, fibrinolytic activity of, 875

W

Wave-guide effects, receptor-optic, 556
Wound healing, corneal, in vitro studies of, epithelial-endothelial interactions, 575

X

Xenon arc and argon laser photocoagulation in blood vessel closure, effectiveness of, studies on intravitreal blood vessels, 441

X-ray diffraction and electron microscopic studies of crystal deposits, calcium oxalate retinopathy associated with generalized oxalosis, 256

Xylose, effects of, on isolated lens, 204

Z

Zinni, zonula, insoluble structural glycoprotein, major constituent of, 991

Zonula Zinni, insoluble structural glycoprotein, major constituent of, 991
